Skills and Competencies

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, Spring Security, Spring Data JPA, Express.js, React, JUnit 5, Rest Assured

Databases: MySQL

Tools & Technologies: Git, Docker, Docker Compose, Postman, Swagger/OpenAPI

Additional: Bilingual, Problem Solving, Communication, Team Collaboration, Adaptability, Continuous Learner

Projects

Clarity API | [GitHub Repository](#)

Java, Spring Boot, Spring Security, JWT, MySQL, Spring Data JPA, JPA/Hibernate, Docker, JUnit 5, Rest Assured

- Developed a RESTful API for a customizable note-taking application, supporting user accounts, notes, labels, custom note colors, and UI templates.
 - Implemented stateless JWT authentication with Spring Security and BCrypt password hashing to secure protected endpoints and authenticate users without server-side sessions.
 - Designed the application using a layered architecture and DTO pattern to separate concerns, control data transfer, and improve maintainability.
 - Built and managed a relational MySQL schema with entity relationships, constraints, and indexes, while using Spring Data JPA for data access and Hibernate for schema validation.
 - Enforced data integrity through database-level constraints and ownership-based access controls, ensuring users can only access and modify their own resources.
 - Containerized the application and database with Docker Compose, documented endpoints with OpenAPI/Swagger, and tested API functionality using JUnit 5, Rest Assured, and Postman.
-

Professional Experience

Saint Anselm College Information Technology Service Desk

Student Technician

October 2023 – May 2025

- Diagnosed and resolved software installation and configuration issues, account-access, and network connectivity issues for students, faculty, and staff.
- Helped users with everything from software installs to password resets and connectivity problems, offering tailored solutions to meet their needs.
- Acted as the go-to person for issues, assessing problems efficiently, solving what I could, and escalating when needed.
- Teamed up with campus IT staff to improve and streamline Service Desk operations, making processes more efficient.
- Mentored new student employees, helping them get up to speed and feel part of the team through training and sharing knowledge.
- Fostered a positive, collaborative atmosphere by actively listening, being patient, and communicating clearly with peers to create a supportive Service Desk environment.

RFK Community Alliance

Overnight Residential Care Assistant

June 2025 – Present

- Monitored client well-being during overnight hours and served as the primary point of contact for emergencies and critical incidents.
 - Maintained accurate overnight documentation, including sleep status observations and notable behavioral or health-related events.
 - Ensured client safety by conducting regular checks, maintaining awareness of client activity, and responding appropriately to unexpected situations.
 - Communicated observations and incident information to incoming staff to support continuity of care and adherence to organizational procedures.
-

Education

Saint Anselm College

May 2025

Bachelor of Arts in Computer Science

Minor in Cyber Criminology

Massachusetts Seal of Biliteracy
