

Keidy Lopez

Keidy.y.Lopez@gmail.com ♦ 774-849-8455 ♦ Greater Boston ♦ [LinkedIn Link](#) ♦ [GitHub Link](#)

Java / Spring Boot backend developer based in the Greater Boston area. Built and containerized a production-pattern REST API with stateless JWT authentication and a normalized MySQL schema, with integration testing currently in progress. Nineteen months of experience providing front-line customer service and technical assistance to students, faculty, and staff in a college IT service desk environment. U.S. citizen, clearance-eligible, and native Spanish speaker with a Massachusetts Seal of Biliteracy.

Education

Saint Anselm College

Bachelor of Arts (B.A.) in Computer Science

Minor in Cyber Criminology

Massachusetts Seal of Biliteracy

Goffstown, NH

August 2021-May 2025

Skills and Competencies

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, Spring Security, Spring Data

JPA, React,

JUnit 5, Rest Assured

Databases: MySQL

Tools & Technologies: Git, Docker, Docker Compose, Postman, Swagger/OpenAPI

Additional: Problem Solving, Communication, Team

Collaboration, Adaptability, Continuous Learner

Projects

Clarity API | [GitHub Repository](#)

Java, Spring Boot, Spring Security, JWT, MySQL, Spring Data JPA, JPA/Hibernate, Docker, JUnit 5, Rest Assured

- Developed a RESTful API for a customizable note-taking application, supporting user accounts, notes, labels, custom note colors, and UI templates.
- Implemented stateless JWT authentication with Spring Security and BCrypt password hashing to secure protected endpoints and authenticate users without server-side sessions.
- Designed the application using a layered architecture and DTO pattern to separate concerns, control data transfer, and improve maintainability.
- Built and managed a relational MySQL schema with entity relationships, constraints, and indexes, while using Spring Data JPA(Hibernate) for data access and schema validation.
- Enforced data integrity through database-level constraints and ownership-based access controls, ensuring users can only access and modify their own resources.
- Containerized the application and database with Docker Compose, documented endpoints with OpenAPI/Swagger, and tested API functionality using JUnit 5, Rest Assured, and Postman.

Professional Experience

Saint Anselm College Information Technology Service Desk

Student Technician

October 2023 – May 2025

Goffstown, NH

- Diagnosed and resolved software installation and configuration issues, account-access, and network connectivity issues for students, faculty, and staff.
- Troubleshoot software, operating system, account access, and network connectivity issues across a diverse user base while documenting resolutions and escalating complex incidents.
- Coordinated with campus IT staff to improve flow of Service Desk operations, ensuring efficient process workflow.
- Mentored new student employees, by monitoring them during the onboarding process and fostering collaborative learning.
- Fostered a positive, collaborative atmosphere by actively listening, being patient, and communicating clearly with peers to create a supportive Service Desk environment.

RFK Community Alliance

Overnight Residential Care Assistant

June 2025 – Present

Lancaster, MA

- Monitor client well-being and safety overnight, conduct regular checks, respond to emergencies and unexpected situations, and serve as the primary contact for critical incidents.
- Maintain accurate documentation of sleep status, behavioral/health observations, and incidents while communicating key information to oncoming staff to ensure continuity of care and compliance with procedures.
